# COMFORT HEAT

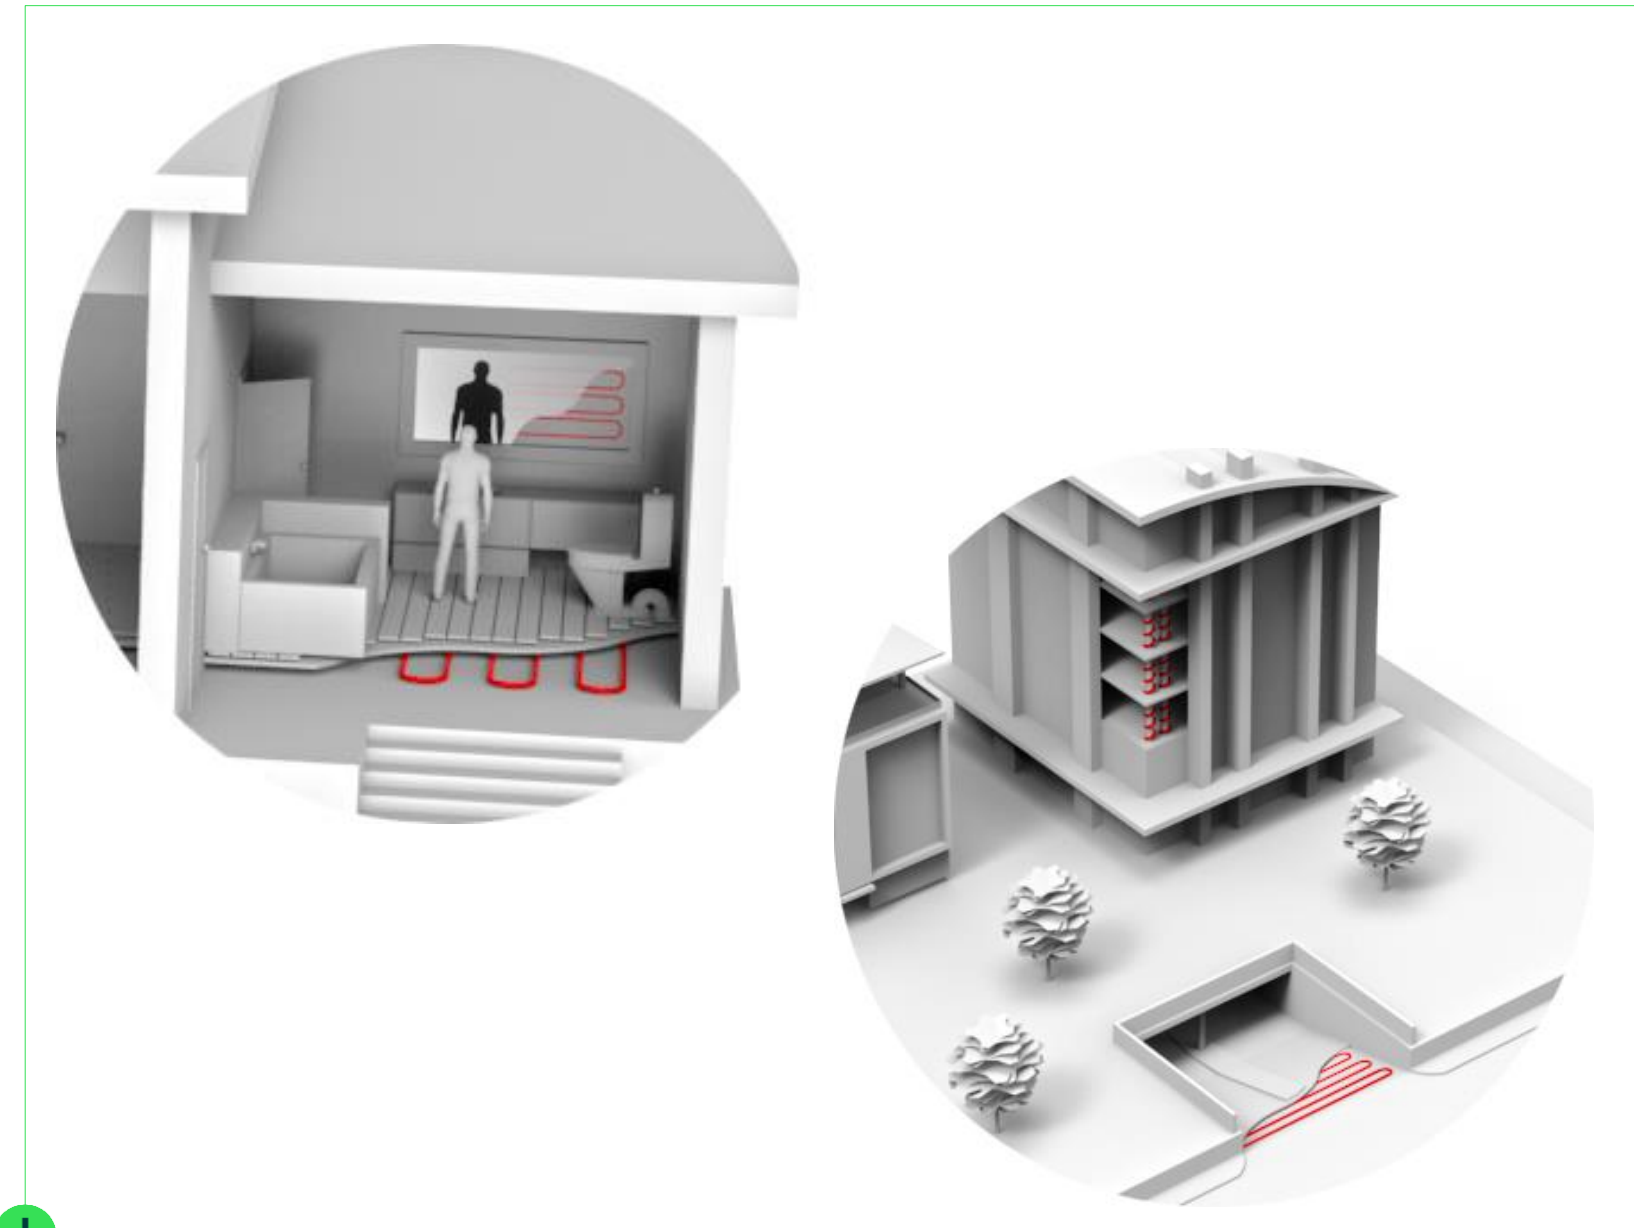

VILNIUS CHAMBER  
OF COMMERCE,  
INDUSTRY AND CRAFTS

**Comfort Heat** develops and manufactures electrical heating systems in Europe for over 27 years. We provide affordable comfort and smart solutions for electric underfloor heating systems. In 2013 we introduced the quality management system according to **ISO 9001** and **ISO 14001** standards to manage performance and identify potential environmental improvements.

**Comfort Heat** provides smart heating solutions with easy installation and pre-fabricated products for:

- **residential and commercial/public building construction and renovation**  
(heating system, water pipes, sewage pipelines, roof gutters, downpipes and underground parking fire sprinklers frost protection)
- **food and oil industries**  
(production pipelines, tanks and process/product temperature maintenance)
- **road engineering companies**  
(bridges, stairs, ramps ice and snow melting systems)
- **heating systems, *powered by the sun***

**Conatus** is a design, technical supervision company that offers practical design solutions and provides quality services in the construction industry. Our experience has been gained in the international market – we have completed a number of projects in Lithuania, Belarus, Ukraine, Sweden, experience has also been gained by participating in construction projects in Latvia and Estonia.

**Conatus** strives to create unique projects that meet the requirements of the Customer. We carry out work with modern design tools - we design in a 3D environment, creating a building information model (BIM). In this way, we avoid human errors, such as inaccurate calculations of materials, dimensions, intersections of utilities, etc.

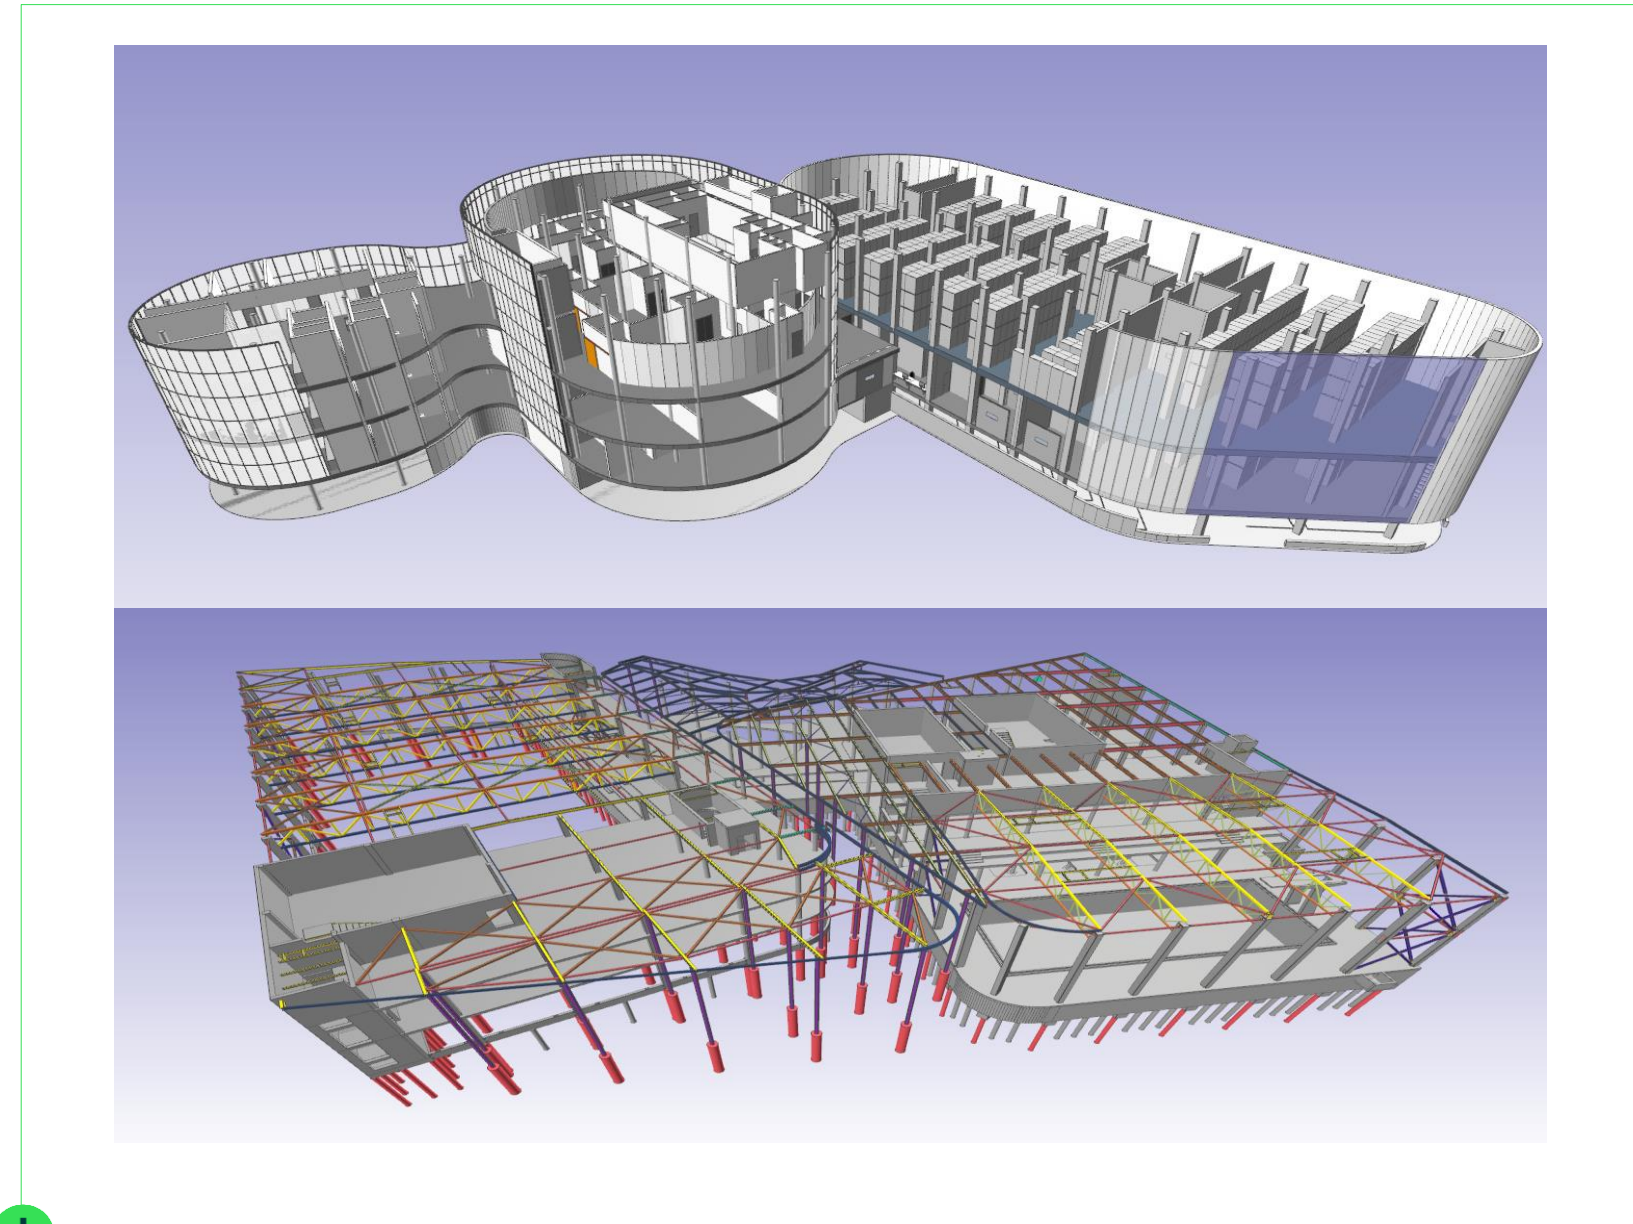

**Conatus** vision is to carry out design work according to the established system, on time and with high quality, saving the Customer's time.

Our Values are the culture of service, the quality of design solutions, compliance with agreements.

The main activity of the company is structure design. We provide different types of structure design:

- Precast concrete;
- Monolith concrete;
- Steel structures of all types for all types of buildings;
- Timber houses, frame houses;
- Masonry structures;
- All types of foundations;

We design structures for all types of buildings: residential and apartment houses, offices, logistics, supermarkets, factories, kindergardens, reconstructions of hospitals, schools and other public sector buildings.

**ARM TECHNOLOGY** is a Lithuanian manufacturer of products that absorb water and water-based liquids to prevent or handle water caused damages.

Due to the advanced production technology - the absorbent polymers used - the products are lightweight and compact - able to absorb large amounts of water and activate on contact with water. We do not use glue, binders or latex in the production of our products.

Looking for importers, partners for distribution, assistance to enter the Polish market.

**VILTEDA** carries out freight forwarding by rail, road transport, sea, air and combined transport, organizes transportation of dangerous and oversized goods, cargo transshipment, warehousing, insurance, customs intermediaries and other services related to logistics.

We have been in the logistics business for more than 30 years, the accumulated many years of experience ensures the quality of the services provided.

Successfully operating from 2008 **ABITRA** provides overland cargo transportation services in all directions. It is the main method of cargo delivery to various regions of Europe, including the Baltic countries.

Services:

- Expedition services
- Warehousing and storage services
- Customs
- Local road transportation.

Interested in various industry and sector companies interested in our high level services

VILNIUS CHAMBER  
OF COMMERCE,  
INDUSTRY AND CRAFTS

**Vilnius Chamber of Commerce, Industry and Crafts** is a wide network and a community of various Lithuanian businesses, educational and research institutions. Majority of the Chamber members provide services, others are engaged in production or manufacturing and/or are involved in trade.

The mission of the Chamber is to represent the interests of its members in the state and regional institutions, promote cooperation between business and science, and provide the services necessary for business and educational institutions.

Main activities:

- Issuing certificates of origin to exporters
- Legal and business consultations
- Incoming and outgoing business missions
- B2B contact sessions and networking events
- Business offers and proposals
- Business trainings
- Local and international projects

Looking forward to strengthening cooperation with partners, finding new business partnerships and cooperation projects.
